PROFILE

As a Web Developer, I have a solid grasp of HTML, CSS, JavaScript, and WordPress, thanks to both my studies and personal projects. I'm really interested in diving deeper into web development. I love creating user-friendly interfaces, and I'm eager to learn more about tools like React, Next.js, Tailwind, and Typescript. Plus, I'm keen on improving my skills in WordPress development. I'm dedicated to mastering it and using it to build dynamic and attractive websites. I'm all about clean and responsive design. I work well in teams and enjoy collaborating to create websites that not only look great but also function smoothly. I pay close attention to detail and am always looking for ways to learn and grow. I'm excited about the opportunity to develop my Web Development skills further and contribute meaningfully to any project I'm a part of.
